

NexFlow

Intelligent Lead Pipeline Management

Makka Corp · Internal Platform · 2025

HSL

MGL

MKL

HCL

The Old Way Was Costing Us

Before NexFlow, every entity ran its own Excel sheet — disconnected, untracked, and unreliable.

Excel Chaos

Multiple sheets, version conflicts, no real-time visibility across teams

Lost Leads

No handoff tracking — leads fell through the cracks between marketing and sales

Zero Accountability

No audit trail, no way to know who changed what or when

Fragmented Data

4 entities (HSL, MGL, MKL, HCL) with zero unified pipeline view

One Platform. Four Entities. Full Control.

Real-time · Role-based · Mobile-first

From first contact to closed deal — every step tracked, every role in control.

The Right Information, to the Right Person

NexFlow enforces role-based access at every layer — from page routing to individual field visibility.

 Marketing	 Sales	 Manager	 Super Admin
■ Create & submit leads ■ Voice dictation input ■ View own lead history ■ WhatsApp handoff trigger	■ See dept-assigned leads only ■ Update sales response ■ Voice dictation support ■ Cannot see marketing data	■ Full pipeline visibility ■ All entities & departments ■ Analytics dashboard ■ Export to Excel	■ Full system access ■ Configure field permissions ■ Manage users & entities ■ Configure dropdowns

Built for How Your Team Actually Works

Egyptian Arabic Voice

Dictate notes in Arabic. Whisper AI transcribes instantly — even with mixed Arabic/English.

Quick Lead Access

Enter any REQ code — instantly pull up the full lead without leaving the screen.

Live Analytics

KPIs, pipeline charts, source ROI, and sector heatmaps — refreshed in real time.

WhatsApp Integration

Configurable lead cards sent directly to coordinators the moment a lead is forwarded.

Multi-Entity Support

HSL · MGL · MKL · HCL — each entity has its own dropdown values, departments, and templates.

Granular Permissions

Field-level access control. Admin sets exactly which role can view or edit each field.

Every Lead is Uniquely Tracked

Auto-generated · Searchable · Audit-trailed · Conflict-free under concurrent submissions

4

Entities

Each with its own prefix

Top Lead Sources

Which channels drive the most qualified leads

Sector Heatmap

Top industries by lead count and conversion

Status Breakdown

Current request status distribution, color-coded

Analytics Dashboard

Filterable by Entity · Date Range · Exportable to Excel

Works Everywhere Your Team Works

Android · iOS · Desktop — One codebase, one experience

Installable on Phone

Add to home screen on iOS & Android — no app store needed

Offline Resilience

Service worker caches the app shell and recent data

Bottom Navigation Bar

Touch-optimised tab bar — all key actions one tap away

Voice Input on Mobile

Record and transcribe directly from your phone

Smart Notifications

In-app alerts for lead handoff, sales updates, completions

Instant Lead Handoff via WhatsApp

Configurable fields · Per-entity templates · Auto-sent or manual wa.me link

Marketing submits lead with all details and routes to a department

"Send to Sales" triggers — WhatsApp card auto-generated from template

Coordinator receives the card on WhatsApp instantly

Sales team picks up the lead, updates status, closes the loop

WhatsApp · BU Coordinator

The Impact on the Business

Speed

Minutes, not days

Lead entry, routing, and handoff happen within minutes. No more waiting for shared files to sync or emails to be noticed.

Visibility

Full pipeline, always

Managers see all 4 entities in one unified view. Filter by source, status, date, or sector — any time, from any device.

Accountability

Every action traced

Every field change, every handoff, every status update is logged with user, timestamp, and before/after values.

Replacing 4 separate Excel files — one intelligent, role-aware, mobile-first platform for all of Makka Corp

Built on Modern, Reliable Technology

Production-ready · Scalable · Cloud-native · Open for future integrations

Next.js 16

Full-stack React framework
Server components, App Router

PostgreSQL

Relational database
Neon serverless on Vercel

Prisma ORM

Type-safe DB access
Migrations & schema management

NextAuth v5

JWT authentication
Role-based session management

Groq Whisper

AI speech-to-text
Free tier · Egyptian Arabic optimised

Vercel

Zero-config deployment
Edge network, auto-scaling

What's Next

NexFlow is a living platform — the foundation is shipped, and the roadmap is ambitious.
